

## Autonomous and Connected Vehicle (ACV) Task Force

### Meeting #4, June 22, 2018 | Engagement Notes

#### Key Themes for Task Force Outcomes **[DRAFT]**

##### Theme: Process Considerations as we Progress

1. Audience and purpose must be more precisely defined for:
  - a. Each of the 4 topics (*Policy Guidance Framework Outline, ITS-Connected Vehicle Integration, Education and Outreach, & Scenario Planning*), AND
  - b. Over time as facts change, our regional knowledge grows, and needs from stakeholders evolve
2. There is an interest in defining roles:
  - a. That of the Task Force
  - b. Perhaps assigning more specific “ownership” or a “lead” to each of the 4 topic categories to ensure accountability, clarity, and progress
3. Continue coordination with state, federal, and other regions as opportunities present themselves

##### Theme: Important, But Not Yet

4. Scenario Planning comes later—perhaps some basic education about its value and need eventually, in the near term

##### Theme: Near Term Focus

5. A steady diet of education is a near term need/action that can serve to continue engagement and augment the conversation and our expertise in this region
